

Playa Del Mar

High-rise Condominium
Fort Lauderdale, FL

SERVICES—Commercial Painting, Sealants

Playa Del Mar is a 70-unit luxury condominium built on the renowned Galt Ocean Mile. Constructed in 1975, Playa Del Mar rises 27 stories above its 400 feet of private Fort Lauderdale beach. Balconies offer magnificent panoramic views of the Atlantic Ocean and the City of Fort Lauderdale.

At Playa Del Mar, our scope of work included sealant replacement and commercial painting following our sister company's, Waterfront Services, concrete restoration project. We removed and replaced perimeter sealants using BASF NP2, a flexible, polyurethane sealant with a 5-year warranty. Similarly, we changed all glass-to-metal glazing to Dow 795, a silicone sealant that cures to a durable rubber joint seal.

“Sealants are an integral part of waterproofing a building. Our team has the skills and expertise to ensure our sealants reach their full performance potential.”

**David Ludwig
Beachfront Painting + Waterproofing**

Once the sealants were replaced, we painted the condo's stucco and doors with StoColor Acryl Plus, a high-performance waterproof coating that protects against weather and salt. With a satin sheen, StoColor Acryl Plus comes in an array of colors and carries a 10 year warranty.
