

Lauderdale Tower

High-rise Condominium
Fort Lauderdale, FL

SERVICE—Commercial Painting

Built in 1964, Lauderdale Tower is a high-rise condominium in the Coral Ridge neighborhood of Ft. Lauderdale. Located on the intercoastal waterway, the condominium houses 124 units in a 10-story building. Residents enjoy close proximity to the ocean, restaurants, stores, and schools as well as boat dockage.

Beachfront Painting and Waterproofing provided commercial painting services for Lauderdale Tower after a concrete restoration and rail replacement project. First, we partnered with Sherwin Williams to provide Lauderdale Tower with a mock-up and color renderings so its team could best choose an updated color scheme for the property.

“Along with careful preparation, we pride ourselves on delivering a meticulous paint job that lasts.”

Beachfront Painting + Waterproofing**

Then, we covered all of the stucco and doors on the 10-story high-rise with Sherwin Williams Resilience, a high-hiding exterior finish with excellent resistance to moisture and a 10-year warranty.
