

Everglades Club

High-rise Condominium
Fort Lauderdale, FL

SERVICE—Commercial Painting

Designed by well-known Florida architect, Charles McKirahan Sr., the Everglades Club consists of 44 condominium residences in a 9-story high-rise building. All units have views of the ocean and/or intercoastal waterway. Located in the heart of the Dolphin Isles community, Everglades Club is within walking distance of restaurants, stores and great nightlife.

Beachfront Painting and Waterproofing provided commercial painting services for Everglades Club following our sister company's, Waterfront Services, concrete restoration project. First, we partnered with Sherwin Williams to provide the Everglades team with a mock-up and color renderings to help them choose a new color scheme.

“We know how to handle, and coordinate with, tenants' and property managers' many competing needs. We understand that communication and customer focus are the keys to a successful project.”

**David Ludwig
Beachfront Painting + Waterproofing**

Then, our meticulous team of painters covered all of the stucco and doors with Sherwin Williams Resilience, a high-hiding exterior finish with excellent resistance to moisture and a 10-year warranty. We also added a new accent design to each of the stair towers.

Looking to refresh your property's exterior in 2020?
