

Beach Front on Singer Island

High-rise Condominium
Singer Island, FL

SERVICES—Commercial Painting, Waterproofing, Sealants, Electrostatic Painting

Beach Front Condominium on Singer Island is a luxurious boutique community with 59 condos and 8 townhomes. The condominiums are located in a 19-story oceanfront building while the two-story townhomes are sited in a adjacent 5-story complex. All units have views of the ocean and/or intercoastal waterway.

We could not be more thrilled with our work at Beach Front on Singer Island. Our scope of work included commercial painting, waterproofing, electrostatic painting and sealants. We covered all surfaces on both buildings with Benjamin Moore's Aura, a high-performance exterior paint with Color Lock technology and a 10-year waterproof warranty.

“Beachfront is very helpful and proactive. They really get involved with the customer. The team is great; I truly recommend them.”

Castle Group Property Management
Beach Front at Singer Island**

Beachfront professionals also performed 1—electrostatic painting of balcony railings and 2—removal and replacement of all window perimeter sealants. Notice the Milwaukee banner in the photo above? We used their cordless sanders on the balcony railings before painting. Windows sealants were replaced with Sikaflex 15LM, a polyurethane-based, non-sag elastomeric sealant.
